The Honorable Lisa Jackson, Administrator
U.S. Environmental Protection Agency
Ariel Rios Building, Mail Code: 1101A
1200 Pennsylvania Avenue, NW
Washington, DC 20460

RE: Hazardous and Solid Waste Management System; Identification and Listing of
Special Wastes; Disposal of Coal Combustion Residuals from Electric Utilities;
Docket ID No. EPA-HQ-RCRA-2009-0640

Dear Administrator Jackson:

Thank you for the opportunity to comment on the above referenced proposed rule, published in the *Federal Register* on Monday, June 21, 2010. As you evaluate the development of federal regulations for coal combustion residuals produced by power plants that supply approximately half of the nation's electricity needs, also known as coal combustion byproducts (CCB), we urge you to craft an approach that protects public health and the environment without unnecessarily burdening the economy and jeopardizing important manufacturing and other related jobs.

We strongly recommend that EPA resist calls to regulate CCB as a listed waste under the hazardous waste authorities of subtitle C of the Resource Conservation and Recovery Act (RCRA). A hazardous waste approach represents the most extreme and burdensome regulatory option available to EPA under federal law, is wholly unnecessary, and inconsistent with past Agency decisions. Instead, we urge EPA to develop non-hazardous waste controls for CCB under subtitle D of RCRA for the disposal of CCB in surface impoundments and landfills, consistent with its 2000 Regulatory Determination.

Decades of work by EPA under both Democratic and Republican administrations implementing the Bevill Amendment to RCRA have consistently affirmed – in two Reports to Congress and two related Final Regulatory Determinations – that regulating CCB under RCRA subtitle C is *not* necessary to protect public health and the environment. In fact, EPA found that such regulation would be environmentally counter-productive because the stigma and related liability concerns of regulating CCB under RCRA's hazardous waste program would understandably have an adverse impact on the important objective of increasing CCB beneficial use.

EPA recently reaffirmed its conclusion that subtitle D controls are protective for the disposal of CCB as evidenced by its decision that management of the CCB from the

Kingston TVA spill in a subtitle D landfill would be fully protective of human health and the environment. EPA readily acknowledges in the pending CCB proposal that subtitle D non-hazardous waste controls for CCB will provide an equivalent level of protection for CCB disposal units as would hazardous waste controls under RCRA subtitle C.

There also is little question that the subtitle C option would have an adverse impact on jobs creation at a time when the nation is still attempting to recover from one of the worst recessions in our history and millions of people remain out of work. We simply cannot condone a regulatory option that harms rather than helps in the creation of new jobs, but unfortunately that is precisely what the subtitle C option would do.

We have heard from many companies in the still emerging CCB beneficial use markets that are seeing jobs lost from the mere suggestion of regulating CCB under RCRA's hazardous waste program. State departments of transportation have cautioned that the subtitle C option would put further restrictions on the important use of CCB in highway and other infrastructure projects. This could have an adverse impact on employment as available alternatives to CCB use in highway projects are considerably more expensive and would reduce the number of projects that could be covered by federal and state funds.

State environmental protection agencies have uniformly warned EPA that regulating CCB under RCRA's hazardous waste regime would immediately more than double the volume of wastes subject to hazardous waste controls, overwhelming the state budgets and employee resources needed to administer these new regulations. These economic burdens on the states will cause even more financial stress on already stretched state budgets, further accelerating the cuts in state jobs.

We are also concerned that the increased compliance costs under the subtitle C option will translate into increased energy rates for millions of American consumers, which will unnecessarily inhibit consumer spending and further burden our collective goal of an economic recovery.

In short, there is simply no basis to pursue the subtitle C option for CCB with its attendant adverse impacts on jobs creation and economic recovery, when an equally protective and more cost-effective alternative is available for CCB under RCRA's subtitle D non-hazardous waste program. We therefore strongly encourage EPA to pursue the subtitle D option in the final CCB rule.

Thank you for your attention to this important matter.

Sincerely,

Tim Holden
